

Raising Mom's Awareness. Reducing Baby's Risk.

Asthma Medications in Pregnancy Surveillance System (AMPSS)

If you're pregnant and taking asthma medications, you may want to participate in the Asthma Medications in Pregnancy Surveillance System.

It's completely observational, which means you'll never be asked to take any medications or change what you would normally do.

If you choose to participate, we will make sure you receive a copy of the results of the study, all free! You can help other moms just like you by taking part today!

Participation includes:

- Between one and three phone interviews during pregnancy
- One phone interview after delivery
- Release of medical records relating to pregnancy

www.otispregnancy.org

Patient information is kept confidential.

The Organization of Teratology Information Specialists (OTIS) is a non-profit organization made up of individual teratology information services located throughout the United States and Canada.
